

# Performance and Improvement

## Policy

Encouraging and empowering all employees to report and challenge health and safety failings through provision of suitable documentation and process.

## Company View

The production, review and implementation of safety documents is a part of health and safety that should never sleep. The Board takes great pride in the steps we take to ensure site and worker safety. This also includes the safety of our contractors and visitors through vetting and responsible documentation demands.

## Key Objectives

Annually review and approve health and safety documentation at Board level.

Reduce the stress upon the work force by streamlining the documentation process.
