

Safe Working Environment

Policy

Understanding the risks our employees face in their day to day tasks and providing practicable measures to control or eliminate the chance of harm.

Company View

Understanding the hazards and the risks our work force faces every day is the only way the Board can look to reduce accidents and potential for harm. The work our staff do is dangerous at times, but that should be no excuse for not having everyone go home each evening. We take pride in our health and safety record and look for opportunities to reduce accidents and harm to zero.

Key Objectives

Carry out and maintain full company risk assessments.

Act upon annual reports and safety inspections swiftly and provide adequate funding where it is needed.
